

KENYON CUTTING TOOLS

by Midwest Rake Company

Quality, competitive alternatives...

Forged Bypass Pruners

Heat treated forged steel construction. Lightweight, ergonomically designed handles and compact 8" (41406) and 8½" (41407) overall length offer easy maneuverability and control. Great for use on small branches on shrubs, roses, vines, etc. Blades are resharpenable. Both models have a sap groove and the 41407 has a wire cutting notch.

with Belt Slots**

Pruners

Hardened and coated non-gumming blades require only minimal force to produce clean cuts. Lightweight, ergonomically designed, red vinyl coated handles offer easy maneuverability and control. Metal latches secure blades for safe storage.
