

Superior strength - uniquely welded and riveted

EXCLUSIVE

- Our "custom" heads feature a steel plug which is welded to the head and riveted through after being pressed into the handle
- Aluminum powder-coated handles provide better grip
- Cold rolled, hard temper steel heads resist bending

Our Bow Rakes and Level Head Rakes are heavy-duty and long lasting tools. The head-to-handle connection features a unique tapered steel plug that is press fit into the powder-coated aluminum handle and then drilled and riveted all the way through. The bow rakes also feature a steel bow that is moved closer to the edge of the head, providing greater lateral stability, and is welded on both the front and back sides of the head for greater strength.
