

SMARTLINE®

SLW1 ECONOMY ON-SITE WEATHER STATION

Consider 5 Reasons why the SLW1 is the **Smart Solution!**

1 ECONOMICAL ET!

SLW1 consistently delivers truly smart watering schedules to any property at an unmatched price. This is not simply water budgeting of run times, this is real ET watering – 365 annual adjustments using real time weather data. SLW1 is the industry's most economical and reliable tool for retrofitting any of the 30 million existing irrigated properties wanting to: save 20 – 60% in water usage, grow healthier plants, virtually eliminate runoff, and put an end to watering worries.

Model	List Price
SLW1	\$149.95
Economy On-Site Weather Station	

2 EASY MOUNTING AND MAINTENANCE FREE

SLW1 is an extremely lightweight weather station that can be quickly and easily mounted to a gutter or facing. Once installed, SLW1 is maintenance free, so no need for regular cleaning!

3 NO BATTERY REQUIRED

SLW1 is built to last. SLW1 requires no batteries to ensure years of reliable operation. Plus, SLW1 receives its power through industry standard 2-conductor wires that easily wire into the SLHUB1.

4 SOLAR SHIELD PROTECTION

Hi-tech, stylized panels protect the temperature sensor allowing flexible installation of SLW in sunlight or shade.

5 RAIN & FREEZE SENSING

No need to buy a separate rain/freeze sensing device. SLW1 shuts down system operation when the set amount of rainfall occurs (1/8 – 1"). SLW1 provides an extended rain delay after a rain event (0 – 99 hours) so you save water by not irrigating too quickly after a rain event. Plus, SLW1 shuts down system operation when temperature falls to 37 F so you never create dangerous icy conditions.
